

Team Talk Coverage Map

VIC

Team Talk is the communications tool of choice for operators of large work groups and fleets. Whilst new technologies have been developed and adopted, two-way radio networks remain the most cost and time effective method of communication. Vertel is Australia's leading provider of two-way radio, providing extended coverage and quality trunked radio offerings. Team Talk sets the highest standard in voice and data communications for fleet operators.

- Wide area coverage
- Fixed monthly usage fee
- Push to Talk, instant connection
- Mobile data compatible
- PSTN (Private Telephone) compatible
- Multiple Talk groups

This map shows coverage of the Vertel Team Talk service. When using a radio based system some areas may be affected by local topography and man-made structures, which may lead to marginal coverage in some areas. Generally, in-vehicle mobiles will experience superior performance than hand held portables.

To learn how Vertel can deliver a customised communication solution for your organisation, contact our Let's Connect Team on 1300 65 75 75 or visit us at www.vertel.com.au.
